

## Machine Learning Engineer (full-time)

You would like to be part of an exciting startup that is just entering the fintech scene?  
You would like to apply your machine learning skills to help solve a big social challenge?  
**Then join our team!**

Monkee is an early stage startup in the fintech space. Our financial coach is combining insights from the field of behavioral psychology with artificial intelligence to help people lead a more financially healthy life. We are launching our product in the first half of 2019 and are seeking to grow our tech team by bringing on board a dedicated machine learning expert that helps us create an environment where every user gets fully personalized advice that helps them achieve their financial goals.

### What you will do:

- Development of a data model to define and analyze influencing factors on individual saving behavior of users
- Analyzing and connecting relevant data sources (including coordination with external partners such as account information service providers)
- Training & optimizing the models
- Implementation of the machine learning components and continuous servicing and improvement of the solution during operation

### What you offer:

You are a team player with a passion for building solutions that help people and create social impact. You have a well-rounded profile with a background in computer science and a track record of applying machine learning concepts to solve real-world problems.

- Completed Bachelor, Master or Ph.D. in Computer Science or a related field
- Solid experience in working with established deep learning frameworks such as TensorFlow
- Advance knowledge of Python
- Proficiency in software development methodologies and tools
- Completed machine learning courses and application of machine learning solutions in a real-world business context
- Team player with high performance orientation

### What we offer:

You are part of a great team in a very dynamic environment where you can make a real impact. Monkee offers you a broad application field to apply your skills with a high degree of autonomy and a chance to actively participate in building out the company's tech stack.

- Competitive minimum wage & additional incentive schemes
- Steep learning curve with a variety of application areas for ML skills
- Access to experts to advance your technical skills
- Central office location in the lifestyle capital Innsbruck with flexible working hours
